

Further education accredited veterinary nursing licence to practise qualifications and delivery centres

The following organisations offer further education qualifications that are accredited by the RCVS as a “licence to practise” in veterinary nursing, and which entitle holders to enter the RCVS Register of Veterinary Nurses.

No other further education qualification or course, regardless of its title, leads to qualification as a veterinary nurse, or eligibility to enter the RCVS Register of Veterinary Nurses. Should you be in any doubt as to the status of a qualification please contact us for advice.

The list of higher education qualifications can be found in the “Training routes” section on the following page: <https://animalowners.rcvs.org.uk/veterinary-careers/i-want-to-be-a-veterinary-nurse/>

Classification of Accreditations

Provisional accreditation is granted for all Accredited Education Institutions (AEIs) with new qualifications that have made substantial progress towards meeting the accreditation standards. Once the first cohort of students completes the qualification, the Veterinary Nurse Education Committee (VNEC) will be presented with all Quality Monitoring (QM) reports undertaken and consider the AEI for full accreditation. Students undertaking provisionally accredited qualifications may be required to pass the RCVS pre-registration examinations. Provisional accreditation will not normally be extended for more than two years, following the first cohort’s completion. Provisionally accredited programmes are automatically deemed to be high-risk and will be audited accordingly.

Full accreditation for 5 years is given to qualifications that meet, or exceed, all the accreditation standards. Where a Provisionally Accredited programme has been awarded Full Accreditation, this will be for the remainder of the 5-year cycle. The RCVS will undertake a full programme review before the end of the agreed accreditation period.

Full accreditation for a shorter period is applied where deficiencies are identified in an existing programme; accreditation will be subject to the deficiencies being addressed within a set period. The RCVS will undertake a full programme review before the end of the agreed accreditation period.

Probationary accreditation is applied where a fully accredited programme is deficient in its resources or procedures and has failed to meet the RCVS Standards. Students may be required to pass the RCVS pre-registration examinations, as well as all qualification requirements, in order to be deemed competent in the RCVS Day One Competences and Skills. This will be at the discretion of VNEC and will be considered on a case-by-case basis.

Terminal accreditation is instigated where a programme is significantly non-compliant with the standards and has been unable to address the concerns within a timely manner. Students completing a programme which is assigned terminal accreditation may be required to pass the RCVS pre-registration examinations, as well as all qualification requirements. VNEC will communicate additional conditions to the AEI as required, depending on the rationale for the decision being taken. The programme will move into an exit strategy and specific details and evidence will be requested by the Veterinary Nursing Department to maintain oversight whilst the final students complete the programme. The provision is quality monitored in accordance with a high-risk provider.

Voluntary Terminal Accreditation is applied where a programme has chosen to cease provision; students may be required to pass the RCVS pre-registration examinations dependent upon the rationale for the programme closure. Students are still required to complete all qualification requirements. The programme will move into an exit strategy and specific details and evidence will be requested by the Veterinary Nursing Department to maintain oversight whilst the final students complete the programme.
